Description			
<p>I want to create a web application using Wt, but I am struggling to set it up and start coding on my chosen IDE, which is Visual Studio 2022.</p> <p>Can anyone please share how can I do it. I tried building with Cmake and I got errors in response. These are the errors:</p> <pre>Cmake Error at C:/Program Files/CMake/share/cmake-3.22/Modules/FindPackageHandleStandardArgs.cmake:230 (message): Could NOT find Boost (missing: Boost_INCLUDE_DIR program_options filesystem thread) (Requires at least version "1.50") Call Stack (most recent call first): C:/Program Files/CMake/share/cmake-3.22/Modules/FindPackageHandleStandardArgs.cmake:594 (_FPHSA_FAILURE_MESSAGE) C:/Program Files/CMake/share/cmake-3.22/Modules/FindBoost.cmake: 2360 (find_package_handle_standard_args) cmake/WtFindBoost.txt:92 (FIND_PACKAGE) CMakeList.txt:241 (INCLUDE) -- Configuring incomplete, errors occurred! See also "C:/Users/Dell USER 1/Downloads/wt-4.8.0/CMakeFiles/CMakeOutput.log". See also "C:/Users/Dell USER 1/Downloads/wt-4.8.0/CMakeFiles/CMakeError.log".</pre>
